SPELLSTRIKE Storyboard - Global Visual Rules

Visual Style Rules

- Cinematic fantasy illustration with anime-inspired character design
- Painterly shadows with clean, ink-like bold black outlines
- Vibrant colors inspired by Bookworm Adventures cutscene art style
- All storyboard panels use a 16:9 landscape format
- Warm gold lighting represents safety, family, and memory
- Cold dark blue and grey represent loss, grief, and the corrupted world
- Dark violet represents corruption and danger
- Cyan-blue represents true word magic
- Each panel uses intentional cinematic composition — rule of thirds, leading lines, or depth layering
- Character costumes and important objects must follow approved references
- Camera angles, poses, expressions, and lighting may change per panel
- No unapproved character, costume, staff, emblem, or color redesign
- No generated text inside images; captions and speech bubbles are added manually in Canva
- No speech bubbles in generated images
